

Press Invitation

THE LATEST DEVELOPMENTS IN BRAIN RESEARCH

<http://forum.fens.org/2010>

The Federation of European Neuroscience Societies (FENS) invites journalists to attend the **FENS Forum 2010**, which will meet in Amsterdam from 3–7 July 2010 to discuss the latest developments in brain research from around the world.

Organised by FENS and hosted by the Dutch Neurofederation, the FENS Forum 2010 will attract around 6000 international delegates to present important advances in fields such as:

- Brain development and learning
- Stem cell therapy and spinal cord repair
- Memory, recognition, speech, hearing, sight and perception
- Depression, stress and hormones

During the Forum **Press Conferences** will offer journalists a rare opportunity to meet and question the world's experts in brain research and developments in treatment.

The fully-equipped **Press Centre** has internet access, telephones, faxes and copiers for your exclusive use. The centre will provide press materials in English and Dutch, resources and expert opinion, and quiet rooms for interviews.

Registered journalists at the **FENS Forum 2010** can attend all specialist press events and the scientific sessions by showing their free **Press Pass**.

An on-line **Press Registration** form is available on <http://press.fensforum2010.eu>. where also a print version can be loaded for off-line registration..

Please note FENS' Media Credentials Policy applies. It is advisable to pre-register and to make early arrangements for accommodation on <http://www.raihotelservice.nl/fensforum2010/index.html>. If you cannot commit yourself yet, you can register on-site or we can send you press materials.
